

Environmental Policy Statement

As an experienced pest controller, Assured Environmental Services offer services to both domestic and commercial customers throughout the Northwest of England. We are a business founded on conservation principles and approach all activities with the aim of maintaining a natural balance between pest control and native species preservation. Our team of pest controllers have many years experience and whilst modern methods of pest control are most often used it is their experience of traditional methods that often provide solutions to specialist situations.

We realise that our field of work has the potential to cause harm to the environment and disturb nature's balance. On this basis we will continually strive to improve our environmental performance and reduce our negative impact on the environment by preventing pollution of land, air and water.

In support of our principles we will:

- Comply with and where feasible exceed the minimum requirements of all applicable environmental legislation
- Prevent pollution to air, land and water
- Educate our employees in environmental issues and the environmental impacts of their activities

To further reduce the negative impact our activities have on the environment we aim to:

- Manage our energy use and explore opportunities for reducing consumption
- Minimise the volume of waste sent to landfill
- Manage our resources effectively and efficiently to minimise raw material waste
- Plan our journeys to reduce fuel consumption

We will endeavour to positively impact the natural environment by:

- Preventing harm to non target species
- Actively participating in **The Campaign for Responsible Rodenticide Use (CRRU)** and following its code of conduct
- Helping preserve the traditional and non-invasive methods of pest control

The above policy is endorsed by the Managing Director who is responsible for its implementation and will ensure it is reviewed and updated when necessary. The policy will be displayed within the organisation and will be communicated to all employees. Copies are also available for the public, customers, suppliers and any other interested parties through our website or on request.
